FOR IMMEDIATE RELEASE

MooreHawke Joins Emerson Process Management Alliance Program

NORTH HILLS, CA—September 19, 2007—MooreHawke, a division of Moore Industries-International, Inc., and Emerson Process Management have signed an Alliance Agreement to co-market MooreHawke fieldbus interface solutions through Emerson's worldwide sales network.

MooreHawke is now on Emerson's Approved Product List for FOUNDATION fieldbus™ device couplers. MooreHawke fieldbus interface devices integrate distributed fieldbus devices with Emerson's DeltaV™ automation system, which is part of the PlantWeb® digital plant architecture.

"Partnering with a company of Emerson's magnitude is a major step in the development of our fieldbus business," says Leonard Moore, Moore Industries' founder and CEO. "We are confident that this collaboration will provide interface solutions that are of great value to Emerson's fieldbus customers worldwide."

MooreHawke became a division of Moore Industries when the fieldbus interface device business was purchased from UK-based Hawke International in mid-2005. Moore Industries, recognized as "The Interface Solution Experts" since 1968, is a world leader in the design and manufacture of interface instruments for industrial process control, system integration and factory automation.
