**FOR IMMEDIATE RELEASE**

**Moore Industries Ranked First Place in Signal Conditioners in Control Magazine Reader's Choice Awards 2010**

NORTH HILLS, CALIF.—Moore Industries, a leader in process control technologies, has been ranked first place in Signal Conditioners by Control Magazine Readers' Choice Awards 2010. The top technology category rankings represent end-user sentiment, as the 2010 Control Magazine Readers' Choice Awards were derived from the opinion of over 1,000 process automation professionals.

The Control Magazine article stated, "Our collective hats are off to all the solution providers that made this year's list. To be mentioned at all, each supplier has successfully demonstrated to a significant, loyal contingent of users that they provide the very best technology in their respective domains."

Moore Industries has consistently performed well in the Control Magazine Reader's Choice Awards, and especially in the Signal Conditioners category, with signature products like the CPT PC-Programmable Signal Isolator and Converter, and the rugged ECT-DIN Signal Conditioner. Recently, Moore Industries developed the award-winning mini**MOORE** family of multi-channel signal conditioners including the MIT and MIX with 2-channel, 4-channel and switch-selectable options.

To view the industry's number one line of signal conditioners according to Control Magazine readers, please visit Moore Industries Signal Conditioner Selection Index at [http://www.miinet.com/products/sg\\_signal.shtml](http://www.miinet.com/products/sg_signal.shtml). In addition to the online product index, *Signal*

*Isolators, Converters and Interfaces: The “Ins” and “Outs”*, a Moore Industries whitepaper, is available for download.
