

Temperature Transmitters and Assemblies

T1: Interfacing Temperature Sensors to a DCS

Problem: We're upgrading our pulp mill. What's the best way for me to interface existing thermocouple (T/C) signals with our DCS?

Solution: Choose a temperature transmitter from our extensive product line. You'll get improved measurement accuracy, lower wiring costs, isolation, linearization, and protection from RFI/EMI interference.

Model Number Example

TDY / PRG / 4-20MA / 10-42DC [BH2NG]
