

Statement on Conflict Minerals

It is our mission to continually and systematically improve our products, manufacturing and business practices to assure the safety of our employees, the public, and the environment. As such, we are constantly monitoring the various worldwide regulations and directives that apply to our business, and we comply where required by law and by our own sense of social responsibility.

Dodd Frank Wall Street Reform and Consumer Protection Act: HR 4173 Section 1502

As a manufacturer of high quality industrial instrumentation products, we use many components from different suppliers. Moore Industries is fully aware of the provisions of section 1502 relating to conflict materials. As such we are working with all of our suppliers to ensure that no materials we purchase from them contain material that was sourced from the Democratic Republic of Congo due to environmental, wildlife and humanitarian concerns.

To date we have received correspondence from our key suppliers that state their active efforts in working with their suppliers to maintain open communication and compliance with HR 4173, Section 1502. Furthermore, we and our key suppliers support the position of the RBA (Responsible Business Alliance), a comprehensive code of conduct that addresses all aspects of corporate responsibility.

Moving forward Moore Industries will continue to work with our electronic component distributors and suppliers on compliance with the above regulation. Statements from these suppliers addressing their efforts on maintaining compliance are kept on file. Should you require such documentation please contact us at sales@miinet.com.
