

August 2023

Description

Moore Industries' universal PSD PC-Programmable Loop Display features a large integral display that shows real-time process status in mA, percent, or any designated 5-character Engineering units (EGU).

Superior Accuracy—The loop-powered PSD reads any 4-20mA signal and displays the information with phenomenal accuracy of $\pm 0.012\%$ of input scale. And because it requires less than 2.3 Volts, it won't burden most loops.

Simple and Versatile PC Setup Program—Using the PC software, the PSD can either be custom scaled to display in a percent or scaled directly into engineering units for indicating process measurements such as pressure, temperature, level, or flow. Span, zero, input range, display range, and filtering frequency can also be easily programmed. Our software will even capture the input range limits of the loop to provide you with the most accurate display available.

Custom 128-Point Linearization Curves – You can plot a custom linearization curve to compensate for non-linear input signals and save them in the PSD's memory.

Easy Calibration—A single button on the front of the unit allows you to easily calibrate your loop by displaying the loop current in mA with three-decimal-place accuracy.

Figure 1. The PSD is available complete in our BH housing; an explosion-proof enclosure that protects your display in even the harshest field environments.

Certifications

Installing easily on the loop, the PSD is protected to NEMA 4X and IP66 standards by our rugged D-BOX enclosure. Explosion-proof enclosures are also available.

Features

- **Easy-to-read, customizable display.** The PSD's independently configured display features two rows of large characters that can be clearly read in the field and set to display any EGU.
- **360°, flexible mounting.** When placed into one of our rugged enclosures, the PSD can be mounted at any angle in nearly any environment.
- **Low voltage drop.** Loop-powered by less than 2.3 Volts, the PSD can even be installed on burdened loops.
- **Custom and square root curves.** Select a square root or linear curve from the library, or create your own. Use our software to input a table in one EGU and have the PC program convert it into a different EGU for display.
- **RFI/EMI immunity.** The PSD is resistant to the harmful, unpredictable effects of radio frequency and electromagnetic interference.
- **Configure with a HART Handheld.** The -HHT HART Handheld Terminals option enables any HART handheld communicator to clip on for configuration and monitoring of a HART instrument connected to the PSD.

Accessories

Each PSD order comes with one copy of our Intelligent PC Configuration Software (Windows® compatible) To order additional software or cables:

Part Number	Part
750-75E05-01	Intelligent PC Configuration Software
804-030-26	Fuse Protected, Non-Isolated USB Communication Cable (required by ATEX for products installed in Intrinsically-Safe areas)
803-039-26	Isolated Configuration Cable (9-pin Serial Port)
803-040-26	Non-Isolated Configuration Cable (9-pin Serial Port)
