

### Process Control and Distributed I/O Networks

#### Peer-to-Host Data Collection Over Ethernet

**Problem:** We have dispersed locations in the field with each having eight to 10 signals that we want to bring into our existing HMI SCADA system. Do you have a remote I/O product that can be placed throughout the plant and communication with our HMI via our Ethernet backbone?

**Solution:** The NCS NET Concentrator System<sup>®</sup> allows any mix of analog, temperature (RTD and thermocouple) and discrete inputs and outputs in a network. Data can be sent via Ethernet to your HMI. The NCS supports OPC and MODBUS/TCP protocols, which are both supported by all HMI strategies.

#### Model Number Examples

EMM / COM / SM / 20-30DC [DIN]

AIM / IO / AI4 / IP [DIN]

DIM / IO / CC8 / IP [DIN]
