

Temperature Sensors, Transmitters and Assemblies

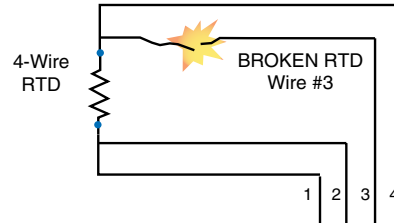

Total Sensor Diagnostics Cuts Time and Cost

Problem: We are wasting hundreds of man-hours each year on maintenance issues with our temperature sensors. There must be a better way.

Solution: The SPT Site-Programmable Transmitter with patented Total Sensor Diagnostics takes the guesswork out of identifying and locating sensor problems. Error messages in plain English guide you directly to the source of failure. Our other transmitters offer similar capabilities.

Model Number Example
SPT / TPRG / PRG / U [DIN]
