FOR IMMEDIATE RELEASE

Moore Industries Engineers Instrument Panels and Systems

NORTH HILLS, CA—March 5, 2020— Moore Industries Instrument Panels and Systems engineering and design group is offering turnkey solutions for your process, automation or Safety Instrumented System (SIS) monitoring and control needs. Moore Industries is expert in designing and building compact and modular solutions used to monitor temperature, pressure, level, flow and safety related processes with high performance instrumentation and components.

Moore Industries can supply and assemble ready-to-install instrument sub-systems for your control and monitoring needs with instrumentation, cabinets, wiring, tubing, relays, and power supplies. Custom instrument panels, enclosures and systems offered by Moore Industries eliminate the need to specify, procure, and assemble multi-vendor instrumentation and hardware. Moore Industries also offers pneumatic interface panels. The pneumatic systems feature Moore Industries' industry standard rugged DIN-style I/P and P/I converters, solenoid valves, and pressure alarms.

Expert assembly is combined with the highest quality fittings, tubing, wiring, and gauges to ensure maximum performance with a long service life. All this comes with complete documentation, expert technical assistance, and the assurance that complete and thorough testing has been performed on all custom instrument panels and cabinets. Moore Industries has over 50 years of business expertise in designing and building compact, modular solutions to solve any customer requirement.

About Moore Industries-International, Inc.:

Based in North Hills, CA, Moore Industries is a world leader in the design and manufacture of rail, panel and field instruments for industrial process control and monitoring, system integration and factory automation. The company has direct sales offices in the United States and additional strategic worldwide locations in Australia, Belgium, the Netherlands, the People's Republic of China and the United Kingdom. The company serves a variety of industries such as chemical and petrochemical; power generation and transmission; petroleum extraction, refining and transport; pulp and paper; food and beverage; mining and metal refining; pharmaceuticals and biotechnology; industrial machinery and equipment; water and wastewater; and environmental and pollution monitoring.
